

Talk Proposal: Design Philosophy

Overview

In this talk we will explore design philosophy as something far greater than visual aesthetics or digital interfaces. Design is everywhere- in the chair we sit on, the pen we write with, the way the city is planned or even how a story unfolds. The goal of a designer is to make the audience see the world differently.

By the end of this talk we will not only appreciate design but will also be understand how to create, experience or improve the world using designs
